CORN SET-ASIDE ORDERED - To assure an adequate supply of raw material for the manufacture of corn products needed in war industries, grain elevators in 124 corn belt counties in Minnesota, Nebraska, Iowa, Illinois and Indiana must set aside, beginning today, 35 per cent of receipts of yellow and mixed corn, and offer the grain to purchasers named by the War Food Administration.

The action, taken in Food Distribution Order No. 96, is designed to make available about 11 million bushels a month to processors. The WFA said recent corn receipts have been less than half the volume reaching terminal elevators at this time last year.
